

## **Digital Conference Recording Equipment**

### **Philips LFH-9750DT Complete Desktop Transcription System with Conference Mics**

#### **Product Description**

This is the perfect base station for consistently reliable digital recording and transcription for meetings of under 30 people.

Now there is a desktop model that makes digital recording and transcription as easy as cassette-based systems, but with all the advantages digital developments offer, such as the exchangeable MMC card, the industry standard storage media for input (giving up to 82 hours of uninterrupted recording using the 512 MMC card), the DSS file format that offers optimal use of storage space and the Visual Workflow display showing the number of files, priorities and special instructions. Archive your meetings with the USB download feature that allows you to transfer recordings directly to your PC. Besides the high performance digital dictator/transcriber, it contains two desktop conference microphones with a 6 foot cord for better quality recording.

#### **Features for the Conference Microphone:**

A very compact microphone designed for use in business meetings either as a table microphone or attached to a lapel. The microphone capsule removes from the stand and attaches easily to clothing. The desktops microphones can be daisy-chained up to 6 for long tables.

**The Digital Desktop 9750** allows you to work in the same way as you would with traditional tape-based transcription. You just insert the Multimedia/SD Card from the Digital Pocket Memos instead of tapes. This is a business tool that brings real added value. The 9750 features hands-free listening to dictation, Workflow management and the ability to store a substantial amount of digitally recorded voice.

#### **Key benefits of the Digital Desktop 9750**

- Digital transcription is as easy as cassette-based transcription
- Works with exchangeable Multimedia/SD Card, the industry-standard storage media for input from mobile dictation devices
- DSS file format, the industry-standard file format for digital recording devices, offers minimum file sizes while maintaining crystal clear sound quality

#### **Total product price**

**\$836.00** (Installation and training is available for \$79.00 per PC)
